

ENGINEERING FUNDAMENTALS WITH LEGO CLASSES

Mine, Craft, Build Survival Game with LEGO

OPEN TO ALL STUDENTS in 1st - 4th grade

1st through 4th grade: Thursday Mar 16 - May 11. Runs from dismissal after school until 5 pm in the Saint Anthony Room

(No class 3/30, 4/13 or 4/20)

Cost: \$120 dollars per participant

Class Minimum: 11 Students (no session unless we have minimum)

Class Limit: 16 Students

Required: Due to STM's safe environment guidelines, each family will need to chaperone one class per child enrolled (i.e.: if you enroll 2 children, you will need to chaperone twice). If you are unable to chaperone, we will not be able to accommodate your child for the classes. Once children are registered through the Play-Well registration link, a sign up genius will be sent to registered families so they may sign up for a session to chaperone. All registered students and parents must also sign a code of conduct form in order to attend. This form will be emailed to registered students with the sign up genius.

Play-Well TEKnologies will provide all materials and instructors for each class. Play-Well TEKnologies provides project-based programs designed to teach principles and methods of engineering, architecture, and science to grades K - 8th, utilizing LEGO and other building systems.

Due to allergy concerns, no snacks will be provided to the entire group; however, you are welcome to send a snack for just your child and they may have it at the beginning of the class. All snacks and drinks must be finished prior to your child being able to build.

TO REGISTER: Play-Well TEKnologies has created a link to their registration site, attached below!
