BRRRRR.....It's Cold Outside! Your healthier move in 2016 is to suds up at night. This one works on a couple of levels. Your body temperature naturally dips at night, which signals it's time to sleep. A warm shower or bath jump-starts this process by raising your temp and triggering a physical response to cool down. The warm water also relaxes your muscles, setting the stage for sleep. Another Bonus* You'll score 15 minutes of sleep in the morning!
