Construction Update: Many things have been accomplished over the last few weeks that we would like to acknowledge:

- Work to replace the copper on the dome of Fr. Bernard Hall continues.
- Work on the back sacristy wall stopped last week when it was discovered that the smaller & lower roof of the sacristy only, was in danger of collapsing. Engineers were called in and a support wall was added to the inside of the sacristy to support the roof and work on the back masonry wall began again. Pictures of this will be on Facebook.
- We discovered this past week that some of the buttresses were used as flues for heaters in the church in the 1850's. We expect to find the same thing with the buttresses on the other side also.
- Work on the tuck pointing of the church tower began this week.
