

**Math+: Advanced Mathematics Learning Opportunity**  
**At Saint Ignatius High School**  
*Gain an edge – with skills that matter*

This is Mr. David Sabol, the Mathematics Chair at Saint Ignatius High School. I will be teaching an Advanced Mathematics class, **Math+**, this Fall for boys and girls in 6<sup>th</sup> to 8<sup>th</sup> grade. This Fall's course focuses on Probability.

I strongly believe in Math+ and would encourage your family to participate. Each Math+ course explores 1 major idea included in Stanford University's introductory math sequence. This is world-class content tailored to younger students. I continue to be impressed by how students get excited and passionate about math during Math+. We want students to be excited about math – and Math+ does a great job doing just that.

This season's course will be taught at Saint Ignatius on Saturdays from 2:00 to 3:00 pm OR 3:30 to 4:30 pm starting on Saturday, October 19<sup>th</sup> for six weeks. The program will cost \$200. Families can sign-up at [www.RedwoodPrep.com](http://www.RedwoodPrep.com).

This Fall, the Math+ program will be focused on Probability, a mathematical concept that has both practical relevance and important mathematical applications. The course will teach probability while exploring many real-world applications from finance to decision-making to poker.

Most interested students can succeed in Math+. I find that students with a gift for math or a real desire to participate can succeed and learn a lot. Students interested in advanced math classes, high performance on standardized exams or general math ability will particularly benefit.

If you have any questions, please reach out. I hope to work with you and your family on this exciting program.

Best,

Mr. David Sabol
