### ABOUT THE FATHERHOOD AND LEADERSHIP INITIATIVE

Fatherhood and Leadership is a national organization started in 2008 by a group of local Philadelphia men. These men realized their most important mission was to develop their children emotionally, spiritually, and socially; but there were few resources available to help successfully fulfill this vocation.

The Fatherhood & Leadership Initiative seeks to fill that void. The mission of FLI is to provide values-based education, tools, and activities that enable men to become better Fathers and Leaders of their families.
