*Equal Opportunities West was established in 1979, as a non-profit organization that provided persons with disabilities individualized supportive services to help secure competitive employment. Over the years Equal Opportunities West has grown into a burgeoning system of support for adults with developmental disabilities. The group's original mandate of helping find employment, whether it be part or full-time, still plays a key role but the overall programming has branched out to truly change the culture and perceived value of individuals with disabilities.*
