## Who is LANline?

LANline Communications, Inc. is the largest independent Internet, telephone, security, and IT services company in the tri-state area of NY, CT, and NJ. LANline has been based in White Plains, New York since 1995 and serves over 800 business clients.

We have over 20 engineers, who all of have college degrees and average over 15 years of technology experience with organizations such as Verizon, AT&T, IBM, Sony Music Group, and much more.

We have deployed complex Microsoft, Apple, and UNIX solutions countless times and stand ready to support your organization's needs.

LANline has passed the test of time, and enjoys some of the highest levels of customer support in the industry. We are ready to work with you and your organization to leverage all technology to better support your business goals.

LANline recognizes the critical business relationship technology has with your day-to-day operations. When LANline comes to solve a problem, it's solved.

**LANline Communications, Inc. is certified ISO 27001 Lead Implementers and Auditors.**

We can lead your organization through this process to ensure your security needs are met and sanctioned.

### **ISO 27001 Benefits:**

#### **Lower Cyber Attack Risk:**

Reduce risk associated with attacks by implementing an information security management system (ISMS). The risk assessment and analysis approach of an ISMS allows you to reduce the risk and impact of an attack.

#### **Meet Legal Requirements:**

ISO 27001 provides an excellent starting point for meeting the technical and operational requirements of the GDPR and other key cyber security laws.

#### **Meet Your Clients' Demands:**

Implementing ISO 27001 will allow you to meet increasingly strict client demands for greater data security.

#### **Secure Your Reputation:**

When you implement ISO 27001, you demonstrate that you have taken the necessary steps to secure your business.

## Our Process Overview

LANline begins each project with an on-site review of the environment and a conversation with the organization to understand their goals. Typically, this is comprised of four areas:

- Data Gathering/Identifying Goals
- Configuration and Design Review
- Analysis
- Recommendations

LANline specializes in high quality technology systems and has the best guarantees in the world.

## Data Gathering/ Goals

Before an organization commits to LANline, we send our engineers on-site and map out the installation to guarantee it is done right. We determine the best technology that will meet the organization's goals. We verify every step of the job with the organization before any proposal is given.

## Review

A review of all information collected will be provided to the organization to identify areas that might be a cause of concern. We adjust the proposal accordingly.

## Proposal

LANline will then and only then design and propose a system that meets your needs.

LANline works with a number of vendors to make sure the solution is correct for your organization.

All work is guaranteed.

We are not a "cut and run" vendor. We'll be with you for the long haul. All equipment, installation and services are warranted for 1 year.
