

40 DAYS FOR LIFE™

HELP SAVE LIVES IN MISSOULA FROM 9/23/2020 TO 11/1/2020!

You can protect mothers and children by joining this worldwide mobilization to pray and fast for an end to abortion!

Through prayer and fasting, peaceful vigils and community outreach, 40 Days for Life has inspired 1,000,000 volunteers!

With God's help, here are the proven results in 24 coordinated campaigns:

- 16,004 babies saved from abortion
- 190 abortion workers converted
- 100 abortion centers closed

Here's how to take part in 40 Days for Life in our community:

- **Vigil location:** Outside BLUE MOUNTAIN CLINIC – 610 N. California St. (near the corner of W. Broadway & California St.)
- **Vigil hours:** 8:00 AM to 6:00 PM (Mon. – Sat.)
- **Local contact:** Brad Tschida (406-546-4349) betschida54@gmail.com / Leslee Tschida (406-240-2861) lkschida58@gmail.com
- **Learn more ... get involved ... and sign up** for prayer times by visiting our campaign

Day 22: Heart begins to beat with the child's own blood, often a different type than the mother's.

Week 3: By the end of third week the child's backbone, spinal column and nervous system are forming. The liver, kidneys and intestines begin to take shape.

Week 4: By the end of week four the child is ten thousand times larger than the fertilized egg.

Week 5: Eyes, legs, and hands begin to develop.

Week 6: Brain waves are detectable; mouth and lips are present; fingernails are forming.

Week 7: Eyelids, and toes form, nose distinct. The baby is kicking and swimming.

Week 8: Every organ is in place, bones begin to replace cartilage, and fingerprints begin to form. By the 8th week the baby can begin to hear.

Weeks 9 and 10: Teeth begin to form, fingernails develop. The baby can turn his head, and frown. The baby can hiccup.

Weeks 10 and 11: The baby can "breathe" amniotic fluid and urinate. Week 11 the baby can grasp objects placed in its hand; all organ systems are functioning. The baby has a skeletal structure, nerves, and circulation.

Week 12: The baby has all of the parts necessary to experience pain, including nerves, spinal cord, and thalamus. Vocal cords are complete. The baby can suck its thumb.

Week 14: At this age, the heart pumps several quarts of blood through the body every day.

Week 20: The earliest stage at which Partial birth abortions are performed. At 20 weeks the baby recognizes its' mothers voice.

Months 5 and 6: The baby practices breathing by inhaling amniotic fluid into its developing lungs. The baby will grasp at the umbilical cord when it feels it. Most mothers feel an increase in movement, kicking, and hiccups from the baby. Oil and sweat glands are now functioning. The baby is now twelve inches long or more, and weighs up to one and a half pounds.

Months 7 through 9: Eyeteeth are present. The baby opens and closes his eyes. The baby is using four of the five senses (vision, hearing, taste, and touch.) He knows the difference between waking and sleeping and can relate to the moods of the mother. The baby's skin begins to thicken, and a layer of fat is produced and stored beneath the skin. Antibodies are built up, and the baby's heart begins to pump 300 gallons of blood per day. Approximately one week before the birth the baby stops growing, and "drops" usually head down into the pelvic cavity.
