

Each week select one activity from the following to complete. Samples of each activities are also listed.

Activity 1: Collage – Impossible Form Stacks

-Materials: 2 White Papers, Pencil, Eraser, Ruler, Color Pencils, Scissors

-Directions:

- 1.) Recall the value chart you created and the 3-Dimensional Shapes we began to draw. Cone, cylinder, sphere, and cube.
- 2.) You are to sketch each shape at least two times of different sizes. Do not overlap.
- 3.) Draw a horizontal line from left to right on second sheet of paper. This will be a tabletop.
- 4.) To make the forms have a realistic appearance, apply the shading technique in each shape with color pencils. Remember to keep the same light source on all shape. Ex: If it is on right, the lightest side will be on the right of each shape. Also color the tabletop and background.
- 5.) Cut each shape and rearrange into an impossible stack of forms on the second paper. Plan before gluing.

Activity 2: Drawing – Radial Name Design

-Materials: White Paper, Pencil, Eraser, Ruler, Scissors, Sharpie or Black Marker, Color Pencils or Crayons

-Directions: (Student will eventually need to use a window with great sunlight.)

- 1.) Cut paper into a perfect square. Preferably 8 ½ inches x 8 ½ inches. Remember to measure all around before cutting.
- 2.) Fold the paper in half horizontally. Open and refold the paper in half vertically. Be sure the corners are lined up perfectly. When you unfold the paper, you will see four sections.
- 3.) Bring the top right corner to bottom left corner and fold. Keep folded to have a triangle.
- 4.) Fold triangle in half to have a small triangle.
- 5.) Fold small triangle in half to have a smaller triangle.
- 6.) Keep paper folded in the smaller triangle. Set the triangle on the table with the point facing up.
- 7.) Sketch your name, nickname, or initials in block or bubble letters. Letters must touch the top and bottom of the triangle. If space is available, you may add details (flowers, patterns, etc.). Details must fill from left to right.
- 8.) With sharpie or black marker, carefully trace pencil marks.
- 9.) Unfold paper completely. Place the paper in a diamond position, name should be on the left side.
- 10.) Carefully refold paper in half to form a triangle. Name will be on the left corner.

11.) With your pencil and paper, go to a window that has the best sunlight. Flip your paper to the back and place upside down on the window. In other words, your name needs to face the window with the blank side is towards you. You will see your name, trace carefully with pencil before going over with sharpie or black marker. The name will start to look backwards, upside down, or both and that is okay! Just keep going!

12.) Unfold and set paper in a square position. Your name will be in 2 triangles and have formed a square. Fold in half horizontally. Repeat previous step.

13.) Unfold to see that now half of your square is covered with your name. Fold in half one last time (names in the back and blank in the front). Repeat Step 11.

14.) Unfold to see your name in a radial design. Color in color pencils or crayons. When coloring keep the same pattern in each name. I suggest to color in one letter at a time and not one triangle at a time. Ex: First letter of your name is blue than all first letters must be in blue.

Activity 3: Drawing – Heart for Mom

-Materials: White Paper, Pencil, Eraser, Ruler, Color Pencils

-Directions:

- 1.) Draw a large heart.
- 2.) Draw horizontal lines evenly spaced between from top to bottom of the page. When the line touches the heart, curve the line upward until it reaches the other side than it is a straight line again.
- 3.) Starting in the middle, draw vertical lines evenly spaced from left to right. Lines on the right side of the heart will curve to the right. Left side of heart, the lines will curve to the left.
- 4.) Select two colors and create a checkered board pattern. Maybe your mom's two favorite colors?

Activity 4: Free Draw Challenge – Believe in Your Selfie

-Materials: White Paper, Pencil, Eraser, Color Pencils, Markers, Crayons, Scissors

-Directions:

- 1.) Take a selfie that represents you. Being silly, happy, excited, surprised, etc. Or you can select a selfie that you or a family member has already taken.
- 2.) Sketch the outline of a phone with case, it can be your own or one that belongs to a family member. Include the details, such as home button, screen, camera, texture or designs on case, etc.
- 2.) Using the selfie you have selected, sketch on to your screen. Capture your expression, keep the background or change it, and the design on your shirt. How do you have your hair? You may add an emoji or phrase.
- 3.) Color in color pencils and cut out your phone.

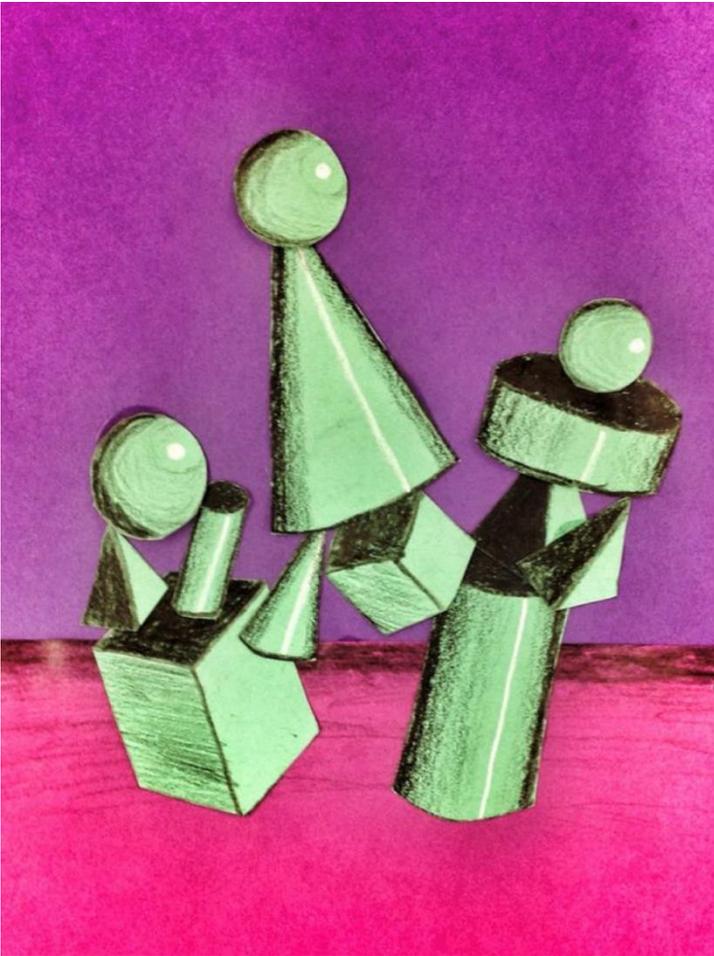

Activity 5: Origami – Jumping Frog

-Materials: Green Construction Paper, Pencil, Eraser, Ruler, Scissors, Black Marker

-Directions:

- 1.) Cut paper into a perfect square. Preferably 6 inches x 6 inches. Remember to measure all around before cutting.
- 2.) Fold paper in half horizontally and vertically. Be sure corners are lined up perfectly.
- 3.) Unfold and set paper in square position. Fold the bottom side to the center line. Leave folded.
- 4.) Fold top left corner to the center line to have a triangle. Do the same with the top right corner.
- 5.) Fold left side to the center and keep folded. Repeat with right side.
- 6.) Fold bottom side up to left and right corners. You will see a triangle on the top.
- 7.) With the flap, fold back to bottom edge. This will be the feet of your frog and will help frog jump.
- 8.) Turn frog over to sit on feet. With black marker add eyes. Test out your jumping frog!
