I am starting my 8th month, and I like to listen to my Mommy's voice! In the last two months the baby continues to gain weight. She is developing a layer of fat that will keep her warm after she is born. In the 9th month she will shift to a head-down position, preparing for birth. Her lungs are now fully developed and capable of making the transition to breathing air. After birth she will continue the human growth process for approximately the next 80 years
