Building a Church, Continuing a Mission Update

On behalf of the Committee, I would like to provide you with two updates regarding the rebuilding process.

First, we have received permission to clean-up the site of the fire and anticipate that this work will begin in the next few weeks.

Second, the Building a Church, Continuing a Mission Committee recommended, and the Archdiocese of Newark has approved, our retention of Foresight Architects of Schenectady, New York (in conjunction with LAN Associates Inc., of Midland Park, New Jersey) to develop a schematic design for a new Church building.

The schematic design phase will include 1) prioritizing project requirements 2) providing preliminary conceptual drawings 3) reviewing municipal code and zoning regulations 4) providing rough drawings of site plans, floor plans and elevations and 5) designing illustrative sketches and/or computer renderings.

I am grateful to the members of the Rebuilding Committee for their help in this process. As the architects begin their work here at Most Blessed Sacrament, please know that we will be seeking the input of our parishioners as the design of the new Church takes shape.

God bless you.

Father John Job
Pastor
