

**Rebuilding a Church, Continuing a Mission -
Committee Report
October 25, 2020**

The progress in rebuilding our church has been significant. The architects and the Committee are nearing conclusion on an approximate cost of the new church whose design reflects the input we received from our parishioners. The new church will comply with the many building code and liturgical requirements that have developed in the last forty years.

Funding is, of course, a key element in moving forward. The Committee is actively engaged in discussions with the insurer to determine a likely range of funds to be received. When that range is determined, and the costs of replacing our church are finalized, we will be able to identify the gap to be filled by a formal capital campaign. In addition, the amount of that campaign will take into account available funds, including the \$3 million remaining in the expansion fund for the prior church facility and the contributions to the *MBS RESTORATION FUND*.
