

Building a Church...Continuing the Mission

December 21, 2020

Site Plans and Concept Renderings

On Monday, December 21, Mr. James Hundt of LAN Associates, along with representatives of Foresight Architects, conducted a parish webinar in which they presented MBS's plans for a new church. A link to the complete video presentation is available on the home page of this website. Five images capturing the basic elements of the new church's design follow, including the basic site plan and a cut-away view of the new building, including the church, daily chapel and community center spaces, as well as concept renderings of the exterior of the church as seen from the Traffic Circle, Franklin Lake Road and, of course, the front entrance to the new Church of the Most Blessed Sacrament.
