

## **A Glance at Blended Learning for Pre-K to Grade 2**

### ***Pre-K:***

Our little ones are exposed to read aloud in multiple genres, hands on math development and a focus on center learning. They are guided through their development and help them to better understand their surroundings, friendship, and who they yearn to be.

### ***Kindergarten:***

Students are exposed to reading and math manipulatives, the beginning of phonics and reading skills, and math concepts derived from the Common Core. They participate in the computer-based peer learning activities, music, physical education, and art.

### ***Grades 1 & 2:***

Students spend extended periods of time on developing reading and math skills. The teachers foster high order thinking, questioning strategies and students are involved in the writing process. Math emphasizes basic skills, word problems, time and money. Small group instruction provides support for all our learners.
