

**PLEASE KEEP THIS PAGE AT HOME ON YOUR COUNTER OR BY THE DOOR- DO NOT RETURN
FOLLOW THESE GUIDELINES EACH DAY TO DETERMINE IF YOUR CHILD IS ABLE TO ATTEND SCHOOL**

Parents should take their child's temperature every day before their child leaves for school. If your child has a fever of 100.0 or over, your child should be kept home from school. A fever is a key symptom of COVID-19. You should ask your child if he/she has any other symptoms of COVID-19 (see below). If your child complains of these symptoms or has a fever, or you answer yes to a question in section two, please, keep them home, call your child's doctor and contact the school to report your child's absence. If your child is sick with a common cold or other ailment your child should stay home until symptoms subside and they are fever free.

SECTION 1: Symptoms

Before you or your child leaves for school each day – Consider all that apply:

_____ fever or chills – Is fever 100.0°F or higher?

_____ sore throat, congestion, or runny nose?

_____ new or worsening cough that cause's difficulty breathing?(If your child has chronic allergies, or an asthmatic cough, is there a change in their cough from baseline?)

_____ diarrhea, nausea, or vomiting?

_____ onset of severe headache, especially with a fever?

_____ fatigue, muscle or body aches; loss of taste or smell?

People with COVID-19 have had a wide range of symptoms reported – ranging from mild symptoms to severe illness. Symptoms may appear 2-14 days after exposure to the virus. People with these symptoms may have COVID-19. This list does not include all possible symptoms. CDC will continue to update this list as they learn more about COVID-19. <https://www.cdc.gov>.

SECTION 2: Close Contact/Positive Test/Potential Exposure& Travel

_____ had close contact (within 6 feet of an infected person for at least 10 minutes) with a person confirmed positive in the past 14 days or tested positive for COVID-19 yourself?

_____ have traveled internationally or from a state with widespread community transmission of COVID-19 per the New York State Travel Advisory in the past 14 days?

(<https://coronavirus.health.ny.gov/covid-19-travel-advisory>) for Official State List.
