

Symptom Screening Checklist for Any Person Entering the School or Facility

The person conducting screenings should maintain a six-foot distance while asking questions.
Ask each person entering the building the following questions prior to entering the facility, school or transportation vehicle.

Anyone showing symptoms or may have been exposed to COVID-19 should not enter the facility.

1. Have you had close contact (within 6 feet for at least 15 minutes) in the last 14 days with someone diagnosed with COVID-19, or has any health department or health care provider been in contact with you and advised you to quarantine?

- YES (The person should not be admitted to school or the facility. The person can return 14 days after the last time they had close contact with someone with COVID-19 or as listed below.)
- NO (The person can be in school or the facility if they are not experiencing symptoms.)

2. Since you were last in school or this facility, have you had any of these symptoms?

(If a person has any of these symptoms, they should go home, stay away from other people and call their health care provider.)

- Fever
- Chills
- Shortness of breath or difficulty breathing
- New cough
- New loss of taste or smell

3. Since you were last at school or in this facility, have you been diagnosed with COVID-19?

(If a person is diagnosed with COVID-19 based on a test, their symptoms, or does not get a COVID-19 test but has had symptoms, they should not be at school nor in the facility and should stay at home until they meet the criteria listed on back.)

- Yes
- No

Returning to Facility after illness/quarantine

An individual can return to school or the facility when a family member can ensure that they can answer **YES** to **ALL THREE** questions:

- Has it been at least 10 days since the child/individual has had symptoms?
 - Has it been at least 24 hours since the child/individual had a fever (without using fever reducing medicine)?
 - Has there been symptom improvement, including cough and shortness of breath?
- If a person has had a negative COVID-19 test, they can return to school or the facility once there is no fever without the use of fever-reducing medicines and have felt well for 24 hours.
 - If a person has been diagnosed with COVID-19 but does not have symptoms, they should remain out of school until 10 days have passed since the date of their first positive COVID-19 diagnostic test, assuming they have not subsequently developed symptoms since their positive test.
 - If a person has been determined to have been in close contact with someone diagnosed with COVID-19, they should remain out of school or the facility for 14 days since the last known contact unless they test positive. In which case, criteria above would apply. They must complete the full 14 days of quarantine even if they test negative.
 - A person can return to school or the facility, following normal school policies. if they receive confirmation of an alternative diagnosis from a health care provider that would explain the COVID-19 like symptom(s), once there is no fever without the use of fever-reducing medicines and they have felt well for 24 hours.
