## **Information about the Science & Technology Program and Aerospace Engineering and Aeronautical Technology Program**

### **Application Process:**

Students must be current residents of Prince George's County, and need a valid PGCPs student ID to apply. Please DO NOT submit an application until your child has a PGCPs student ID. To obtain one, a census enrollment form must be completed at your boundary school. It is highly suggested to contact the school first to ensure proper documentation is provided to accompany the form.

Application for the [Science & Technology and AEAT Programs](#)

Application Deadline is December 18, 2020 4:00pm

### **Selection Criteria:**

Due to Covid, there will be no entrance test this year. Eligibility will be based solely on grades and a lottery. The grades are unweighted; only the core courses (English, science, math and social studies) are considered.

The first three quarters of the last year and the first quarter of this year will be used according to this formula.

## Selection Criteria - Equation

Due to the shift to distance learning, the first three quarters of the 2019-2020 year will be weighted higher than the first quarter of 2020-2021.

**The lottery** will be based on the highest Calculated GPA Scores. For Eleanor Roosevelt High School, the top 350 scores will be placed in the lottery. 250 students will then be randomly selected as eligible for the program and the next 100 will be on the waiting list. For Oxon Hill and Charles Herbert Flowers, 250 students will be placed in each lottery and 150 students will be selected in each as eligible and the remaining 100 will be on the waiting list. It has not yet been determined the number of students who will be in the lottery for the AEAT Program.
