

Test-time

By:Emily Palladino and Shannon Meagher

Map testing is here! Grades K-8 will be testing for three days. One day is Reading, one day is Math, and one day is Language.

While we are welcoming 2020, students need to get ready for the MAP testing, round 2. Our 8th graders already started the testing and here's what a couple of them had to say. "There were some questions that were difficult. Some questions didn't make sense to me, but most of them were easy," said Isadora Gonzalez. "We still have one test left that we are doing this afternoon. The math wasn't bad because it was things that we did in 7th and 8th grade. The reading was fine as long as you read carefully," said Samantha Darconte.

Every student will be taking these tests. The 8th graders said you need to pay attention for the test and to try your best.
