

# Student Login - Grades K through 3

We have set up and turned on your student's school account in Google Education. To facilitate getting everyone setup a common password was initially used. This password must be changed the first time the account is logged into so please help your child log on and change their password. It will need to be at least 8 characters long.

For our students, user names are setup as follows:

*firstname.lastname@KingstonCatholic.org*. Capitalizations will not matter in the username (but will matter in the password). The initial password will be the word *password* (all lowercase, no spaces). For example

Student:	Jeff Albert
Username:	jeff.albert@kingstoncatholic.org
Initial Password:	password
New Password	Fas+Karz2020 (please don't use this as your new password create your own)

If you have any trouble logging (forgot the new password already, can't get the student's username to work, etc.) please contact the TechTeam at [KCTech@KingstonCatholic.org](mailto:KCTech@KingstonCatholic.org). The Tech Team will be monitoring this account to provide login assistance.
