

Welcome Back, Students!

Although the 2020-2021 school year might look a little different this year, I'm excited to spend time making and exploring art with you. There are many new changes within the walls of KCS including that Art will be on the move this year! I will be rolling around to each of your classrooms, bringing with me materials you may need for that project.

While I would love to provide all the materials for you, I am unable to in order to keep you all safe. Therefore, supply lists by grade for art are being provided through a link on the Art page, as well as within the lists from your classroom teachers. It is important every student has all materials to ensure we all have an equally fun and creative year.

This year's curriculum will look more deeply into Art History and the artists and styles that make up much of the art we see today. It has always been my desire to help you create works of art that you are proud of and want to bring home to show your family. As always, the projects we create will hopefully strengthen your desire to design beautiful and meaningful pieces. There is always something new to learn in art so I hope to broaden your knowledge and love of art throughout the school year.

Art is meant to be fun, not based on skill level. In my classroom, I have three guidelines I follow when grading your work: (1) Follow instructions (2) Work neatly (3) Show enthusiasm for your work. My hope is for each student to try their best and learn discover something new.

I am looking forward to another exciting and colorful year with you!  
Sincerely,

Ms. Hurley  
Art Teacher
