Children as Commodities

*Read the full version at

At seventeen, Natalie* discovered that her parents had contracted with another woman to become pregnant using her father's sperm and the woman's own egg. Natalie became estranged from her parents, hurt that money, rather than the physical expression of married love, was the context in which she was brought into the world. Since the advent of *IVF* (in vitro fertilization), the floodgates have been opened to bringing about reproduction through egg and sperm donation and surrogate pregnancies. Yet these technologies are fraught with medical, legal, and moral complications. Children deserve to not be created as a product of reproductive technology, but to be given by God, and to be born through married love.
