

# POST SPRING BREAK TESTING EVENT

Wednesday, April 7  
9 am - 7 pm

Saginaw County Health Department parking lot  
1600 N. Michigan Avenue

**These tests are free and do NOT require a doctor's order.**

Those seeking testing will stay in their vehicles and be served drive-thru style. Health Department staff will provide instruction on how to "self collect" a nasal sample and insert it into a tube. Staff will fill out the test requisition and label the tube, providing test results back via email 24-48 hours later.

The Saginaw County Health Department recommends that non-vaccinated individuals get tested and work/attend school remotely for 7 days upon return from spring break (or for 10 days without a test).
