Abortion advocates usually refer to the human being growing in her/his mother's womb in dehumanizing terms like "product of conception" and suggest that most abortions are done before fetal organs are functioning.

Actually, the vast majority are done after the fetal heart has begun beating. A baby's heart begins to beat at about 21 or 22 days after fertilization. That's at about 3 weeks of development. The vast majority of abortions in the United States are done well after this point.

Adult Education Classes coming soon to St. Jude's! Open to all!

From its inception the Church founded by Jesus has had its share of problems. Major renewals and reforms dot the landscape of our Church's history. Sometimes the Holy Spirit just needs to do some housecleaning to get the Church back on track. Remember Martin Luther and The Reformation? The thing is, even though Jesus is our foundation, we the Church are fallible humans and we mess up.

Come join us beginning September 23 at 7 p.m. at St. Jude's for The Reformations. This is a 12-week course presented by Dr. Christopher Belitto, Ph.D., in DVD and discussion format. Cost of the course is \$10. Bring your friends and neighbors!

In this course we will learn about Church reforms before Luther, about challenges that have arisen regarding Church authority in society, about a time in Church history when there were three popes deciding who was the real one! Let us be encouraged by the workings of the Holy Spirit who leads the charge, carrying the battering ram against the gates of hell and the Evil One who is bent on destroying Christ's Bride, his beloved Catholic Church.

If you have any questions or would like to state your intent to attend this class, please text Bea Berg at 701-213-2028, or email Mary Franklund or Bea at franklundm@gmail.com or beadoug16@gmail.com.

The annual Catholic Charities Financial Drive is September 29–30, 2018. An envelope will be located in the pews this coming week. A presentation will be made on the weekend of the 30th of September.
