

24 May 2021

Dear Rising Fourth Graders,

I am excited to be your child's math teacher next year. **Essential for success in fourth grade is mastery of multiplication tables through twelve.** Please practice with your child for a few minutes each day. The following online sites can be used to practice: <https://www.ixl.com/math/grade-3> and [www.splashmath.com](http://www.splashmath.com). Flash cards can also be used to master the multiplication tables.

The **summer math work** for your student is Summer Solutions. This is a **required assignment** and **due the first day we return to school** in August. For each day the assignment is late ten points will be deducted. If the assignment is more than three days late, the result will be a zero for the assignment.

Thank you for your support.

God bless,

Mrs. Rayhel
