

Summer Practice for Third Grade

Let's prevent summer slide and keep our children learning year-round!

Reading

Read, Read, Read! Nothing improves fluency like reading. This can include having your child read to themselves, someone else, or you reading to them.

Everything helps them grow. A great goal would be to read for at least 20 minutes per day. Help them start this habit!

Students will be required to read one chapter book from the Accelerated Reading list. It **must** be a level 2.5-3.5. You may go to www.arbookfind.com to find accelerated reader books and levels. Attached you will find a graphic organizer your student needs to complete to go along with their selection.

I included several sheets your student should use to practice skills they have already learned. Please bring these to the first day of school.

Writing

Attached you will find blank writing sheets. I would like your child to record their favorite summer memory from the month of July. This should include an illustration and writing.

Math

Students are required to know their basic addition and subtraction facts before entering third grade. Daily practice through games and repetition will help make sure they are prepared. I have enclosed two worksheets your students should be able to complete in 4.5 minutes when the school year begins. We will be taking a quiz on this within the first week. There are additional pages attached that should be completed to help practice necessary skills. The following websites may also be useful: www.aplusmath.com, www.aaamath.com, www.funbrain.com, www.mathfactcafe.com, www.coolmath4kids.com, www.mathplayground.com

Please bring in all assigned work from packet to the first day of class.

Most importantly, have fun and I will see you soon!

Hooked on a book!

By, _____

What is the title?

Who is the author?

Who is the Illustrator?

Tell about your favorite character in the book

How does the book begin?

How does the book end?

What did you learn from the book?

Name _____

Nouns, Pronouns, Verbs, Adjectives, and Prepositions

Jessica to the sunny beach with her yesterday.

She ate the pink ice cream with a sliver spoon.

The seal jumped out of the huge ocean.

We rode in the boat with Jimmy and his kind friends.

I flew in the airplane for five short hours to get to Hawaii.

Hannah found shinny shells on the sandy beach.

They swam in the cool lake and ate crisp watermelon.

The ice cream melted in the blazing sun.

We barbecued big hot dogs on the sizzling grill.

The buzzing mosquitos flew through the dark night.

They rode down the river in the red canoe.

In each sentence circle the nouns with a green crayon, circle the verbs with a yellow crayons, circle the adjectives with a red crayon, circle the pronouns with a blue crayon, and circle the prepositions with an orange crayon.

Name _____

Main Idea and Key Details

The Fourth of July is an important American holiday. On this day, we remember America's birthday. We celebrate by having parades, enjoying barbecues, and watching fireworks. Many people wear red, white, and blue to represent our flag. What do you like to do on the Fourth of July?

Main Idea:

Key Details:

There are many water sports that people enjoy during the summer months. Some people like to waterski. Others may surf in the ocean. Others may swim and even compete in races. What summer water activities do you enjoy?

Main Idea:

Key Details:

Name _____

Expand It!

The girl went swimming.

A dog ran.

The kids ate.

A bug flew.

The ice cream melted.

Rewrite each sentence, adding details to make it more interesting.

© Kendra's Kindergarten 2016

Name _____
Comparing Characters Book Title _____

Read a book. Choose two characters from the book. Label the diagram with their names. Write things that are true only about character one in the first circle. Write things that are only true about character two in the second circle. Write things that are true about both characters in the middle.

Name _____

Ask and Answer

Whales are amazing creatures. They are mammals that have adapted to live their lives entirely in the ocean. There are many different kinds of whales and they range in size from about 8 to 110 feet. Whales can swim for long periods of time underwater, but they must come to the surface regularly to breathe. They breathe through their blowholes. Whales are warm-blooded and have a layer of fat, or blubber, beneath their skin to keep them warm. Some whales have teeth and others have baleen. Baleen is similar to bristles and filters out food for the whale. Whales have no natural predators, so they can live for long periods of time in the right conditions. Whales certainly are some of the most interesting creatures!

Where _____ ?

Why _____ ?

How _____ ?

What _____ ?

Read the passage. Write questions about the passage beginning with the given question words. Answer your questions.

J U I Y

Name: _____

Handwriting practice lines consisting of multiple rows of solid top and bottom lines with a dashed middle line for letter height guidance.

Math Practice

Games to Play with a Deck of Cards:

- Remove the jack/queen/king from the deck; Ace can count as "1"

Place Value War:

(covers place value, comparing numbers)

- * Divide the deck in half; each player gets half
- * For two-digits, players each flip over 2 cards; for 3-digits, flip over 3 cards
- * Students flip over cards and arrange them in order so they can make the greatest number
- * The player with the greatest number takes all the cards and adds them to his/her stack
- * Play continues until all cards are taken by one player!

Addition (or Subtraction) Battle:

(basic facts practice)

- * Divide the deck in half; each player gets half
- * Each player flips over one card
- * The first player who adds (or subtracts) the 2 cards together correctly adds them to his/her stack
- * In the case of a tie, players go again, stacking the new cards on top of the old ones and the winner gets all the cards.
- * Play continues until all cards are taken by one player!

Name _____

What is your favorite part of summer?

camping building sandcastles Fourth of July swimming ice cream warm weather

According to the graph, which part of summer is the favorite? _____

How many people all together like ice cream or swimming best? _____

How many more people like ice cream than building sand castles? _____

Do more people like camping and swimming or warm weather and building sandcastles?

Do more people like ice cream or warm weather, camping, and Fourth of July combined?

Use the tally chart to create a bar graph. Use the information on the graph to answer the questions. Use the back to solve equations

Name _____

Money Word Problems

Molly has \$1.75 cents. She wants to buy a water gun and sunglasses. Does she have enough money?

Take bought sunscreen and some lemonade. He paid \$2.00. How much change will he get back?

What costs more: a beach ball and a popsicle or a water gun and flip flops? How much more?

Ryan bought flip flops, a beach ball and sunscreen. How much did he spend?

Use the prices above to solve each word problem.

Name _____

Number Riddles

I have 3 groups of 100, 4 groups of ten, and 6 groups of 1. Which number am I?

I have 6 groups of 100, 9 groups of ten, and 7 groups of 1. Which number am I?

I have 2 groups of 100, 6 groups of ten, and 8 groups of 1. Which number am I?

I have 7 groups of 100, 2 groups of ten, and 0 groups of 1. Which number am I?

I have 4 groups of 100, 7 groups of ten, and 1 group of 1. Which number am I?

I have 6 groups of 100, 5 groups of ten, and 4 groups of 1. Which number am I?

I have 9 groups of 100, 2 groups of ten, and 3 groups of 1. Which number am I?

I have 8 groups of 100, 9 groups of ten, and 3 groups of 1. Which number am I?

Write the numbers to solve the riddles.
