New Business:

The School Advisory Council discussed the importance of building our school community and increasing the dedicated involvement. The following questions were asked and will be discussed in our future meetings as a whole group or sub-committee:

1. Should we require service hours from each school family?
2. How would we track service hours?
3. At registration, would it be best to invite families to sign up for future dates to commitment their time, treasure and/or talent?
4. What incentives are best for children and families to encourage attendance at events?
5. Would holding HASA meetings after House Mass Sundays increase attendance and involvement within our community?
