

Christmas Lighting Instructions

There are two remotes for the Xmas lighting located on the shelf to the left of the entrance to the Sacristy.

The white remote has 3 on-off buttons: Channel 1 is for the lighting on the St. Mary's side. Channel 2 is for the St. Joseph side. Channel 3 is for the Choir Loft lighting.

The black remote controls the lighting on/adjacent to the main altar.

Each of the 10 church windows has light controlled by 2-battery-paks as shown in the images on the right.

One pak has a simple on-off switch, while the other has multiple settings. Use the "Steady-On" or "Off" settings for these lights.

The wreath on the piano also has lights with a black battery-pak. Open the top exposing the batteries. Use the "Steady On" or "Off".
