

St. Mary Early Learning Center

Your child will develop academic, physical and social skills while enjoying the learning process.

They will be given opportunities to be creative, make independent decisions, and grow their self-confidence.

Preschool

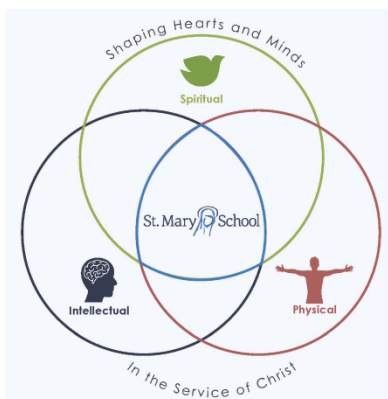

This program is intended to prepare children for Developmental Kindergarten and Kindergarten. Your child will use hands-on activities so they can experience math, science, music, and literacy in a fun filled environment. Close observation occurs constantly by the teachers, who prepare activities appropriate for each child's developmental levels. We emphasize learning in socialization skills, sharing and getting along with others in a group through the creative use of activity centers. Children learn writing their name, numbers, letters, shapes, sign language, Spanish, and religion.
