

EMERGENCY MEDICATION ADMINISTRATION

Dear Assumption Early Learning Center Families,

The St. Louis Archdiocese has adopted a policy on Emergency Stock medications. We have decided to stock Emergency Epinephrine (Epi-Pens) and Albuterol for those students with **no known history** of anaphylaxis or asthma. These medications will only be administered in accordance with written protocols provided by the Archdiocese Physician Consultant.

Our school nurse, Mrs. Cannon, or a trained Assumption Staff member may administer these medications when they believe that a student is having a life-threatening anaphylactic reaction or life-threatening asthma episode. These medications are not meant to replace medications of students already diagnosed with asthma and/or anaphylaxis.

Please complete the Emergency Consent form below and contact Mrs. Cannon at cannons@assumptionstl.org if you have any questions.

Sincerely,

Shelley Michael

EMERGENCY CARE PROCEDURE

In case of a critical emergency, the parent or guardian will be contacted first, if possible. The privilege of contacting your family physician will be used only when the parent cannot be reached. If we are unable to contact the parent, the emergency ambulance service will be utilized. This service provides emergency care and transportation, free of charge, to Mercy Hospital South for schools in the Mehlville Fire District.

If we cannot be reached, and in the event of an emergency, we give consent for the school to obtain such medical care as deemed necessary for the welfare of my child(ren).

EMERGENCY MEDICATION PROCEDURE

Emergency Medication Consent Form According to Missouri State Statute Section 167.630, RSMo and 167.0635.1, RSMo schools are able to obtain and maintain an adequate supply of epinephrine pre-filled auto syringes and asthma-related rescue medications for emergency use by the employed school nurse licensed under chapter 335. The school nurse or another employee trained and supervised by the employed school nurse may administer these medications when they believe, based on training, that a student is having a life-threatening anaphylactic reaction or life-threatening asthma episode.

The St. Louis Archdiocese has adopted a policy on Emergency Stock Medications. Assumption has decided to stock Emergency Epinephrine and Albuterol for those students with no known history of anaphylaxis or asthma. CONSENT Parental approval to use standing physician ordered medications allows for efficient treatment of students' emergency health issue.

_____YES _____NO I give my permission for the nurse or trained designee to administer appropriate standing physician ordered emergency medications for my child(ren).
