

## **Measures for Preparedness**

March 13, 2020, the Ventura County Public Health declared a health emergency in response to the local and global effects of the Coronavirus, since this time we have implemented several action measures to ensure we are prepared should our facility have COVID-19 positive residents. These measures include:

1. Development of a written COVID-19 Plan.
2. Ongoing identification of staffing needs, equipment, and supplies in the event of a COVID-19 surge.
3. Weekly employee education and training to address infection control and best practices.
