Please Note: When a generic is available, but the pharmacy dispenses the brand-name medication for any reason, you will pay the difference between the brand-name medication and the generic plus the brand copayment.

Copayment, copay or coinsurance means the amount a plan member is required to pay for a prescription in accordance with a Plan which may be a deductible, a percentage of the prescription price, a fixed amount or other charge, with the balance, if any, paid by a Plan.

Plan Member Rights and Responsibilities can be found at Caremark.com.
