

Geometry Regents/Honors (4232/4233)

Summer Homework Assignments

The following assignments are for students who are scheduled to take Geometry Regents or Honors this upcoming September 2019. The summer assignment is **broken into three sections** so that students can progressively complete their work throughout the summer. Below are links to the **three** summer homework assignment sections. Students taking Geometry Regents or Honors must **complete all three assignment sections before September 9th**.

Each section below contains both a link to a printable PDF of the assignment and a link to a website where students are required to submit their solutions online. When inputting your solutions, please type your first and last name when prompted. If you have any questions or need technical support please email the Math Department Chairperson Mr. Grover at Grover@sjbdhs.org.

Online solutions only will be accepted. The PDF printout option is optional for you if you want to do the work on paper before submitting your solutions. You will not be handing in the PDF to your teacher.

Section 1
