June 25, 2020

Dear Parents of: \_\_\_\_\_

Effective September 1, 2007, New York State requires all students in 6th grade students who are 11 years old or older, must receive an immunization containing tetanus toxoids, diphtheria and acellular pertussis (Tdap) prior to the start of school. If your child will turn 11 years old during the 2020-2021 school year they must receive the Tdap within 2 weeks after their 11<sup>th</sup> birthday.

This is a New York State requirement that is necessary to enforce. Please provide documentation of this immunization. Failure to comply will result in exclusion from school.

Should you have any questions, contact your child's doctor or call me at 631-667-4044 x 134.

We appreciate your prompt attention to this matter.

Sincerely,

Kathy Buda, R.N.

S. Susan Snyder
