

# Learning Centers:

Centers can easily be set up in your home.

A writing center can have paper, pencils, markers, coloring sheets, stickers, construction paper, crayons, envelopes, word cards( write our simple words for children to copy), scissors, and glue.

A block center includes blocks and other building materials.

An Imaginary play area can have dress up, kitchen materials, theme based activities and props.

A science center may include magnifying glasses, magnets, rocks, balance scale, theme based materials to investigate.

A sensory play area can include setting up a bin with any of the following items such as sand, water, shaving cream, homemade clean mud(I will give recipes for this at a later date-the one I have now includes toilet paper and that seems coveted at the present time;-)), rice, playdough, beans, dry pasta.
