

August 26, 2020

Dear Saint Anne's School Community,

Thank you all for participating in our forums last week. We believe that we were able to present the Saint Anne's Secure Reopening Plan in a clear and effective way. If you were unable to make this meeting, or want a refresher on the content you will find it on our [school website](#):

- 1) Our presentation slides
- 2) Msgr. Harold's address
- 3) Updated FAQ sheet

Please review these documents to make yourself acquainted with our reopening process.

We have begun a new section of our website to highlight Health and Safety. Currently we have included some video resources on hygiene etiquette and mask wearing for kids. We hope that you will find these resources helpful. As the year progresses we will continue to update this page to include up to date and relevant resources for families.

As mentioned on our forum, we will be using Pickup Patrol to assist us with arrivals, dismissals, and in administering our health questionnaire. We believe this will increase the safety and health of our building. For more information, please visit: <https://www.pickuppatrol.net>

Mrs. Zino, Nurse Marie, and I have received our certification in COVID-19 Contact Tracing from Johns Hopkins University Bloomberg School of Medicine. This will help us with the New York State requirement for COVID-19 contact tracing. We found this certificate program insightful and helpful as we move forward to open our school year. This is in addition to my FEMA certificate Introduction to Continuity of Operations Planning for Pandemic Influenzas.

Currently, the staff and myself are working toward our secure reopening. Soon we will have our door wide open again. Saint Anne's is excited to be with you all again!

God bless,

Paul Morisi
