

# ST. AIDAN SCHOOL

## REMOTE LEARNING

### Remote Learning

- Our school has a robust remote learning plan that can be enacted overnight if necessary.
- Our plan will be built upon the plan that we developed in March.
- Our school has guaranteed that each member of the school community will have access to this remote learning.
- Students who do not have internet access at home can reach out to the school and we will communicate with our service provider to provide the student with internet.
  - Internet service providers are providing needy students for little to no cost during the current pandemic.
- Since March we have improved our remote model to provide for the highest standard of online learning achievable.
- Teachers will deliver instruction through a combination of live and even asynchronous means if necessary.
