

COVID-19 Testing Template

Screening

- Each person, regardless of status, who enters our school will have their temperature checked before the school allows entry.
- Entry will be denied to any person whose temperature equals or exceeds 100 degrees Fahrenheit.
- If a person has a temperature equal to or exceeding 100, a second temperature will be administered no more than fifteen minutes later to confirm body temperature.
- Faculty and staff at our school will fill out a daily form to affirm that they are healthy and in compliance with present guidelines and executive orders.
- Parents will receive and be expected to complete a weekly COVID-19 screening assessment for their children.
- Faculty, staff, and students must stay home if they experience symptoms of COVID-19 and are encouraged to stay home if they feel unwell in any way.

Arrival and Departure

- Students, staff, and faculty will enter and leave our school through several separate entry points to reduce foot traffic density.
- Additionally, arrival and departure may be staggered to further reduce density at these points.

Potential Cases

- Students, staff, and faculty who are denied entry will be directed to monitor their symptoms and seek the advice of their health care provider.
- If health care provider recommends a COVID-19 test:
 - Until a test result arrives, the person should remain quarantined at their domicile along with their siblings.
- If presenting signs or symptoms during the day:
 - Direct student to isolation room and nurse will make a determination if the student should be referred to a health care provider for testing.
- **If a positive result returns:**
 - The person must isolate themselves for 14 days after the onset of symptoms and they have gone at least 24 hours without symptoms or fever without the use of medicine.
 - Contact tracing must be performed and close contacts with the case must be told to quarantine.
- **If a negative result returns:**
 - The person should consider receiving another test if they continue to feel unwell to rule out a potential false negative.
 - If a false negative is unlikely by advice of medical professional or end of symptoms, the person may return to school after receiving a negative result.
