

**COVID Guidelines**  
**Updated 9/7/21**

**Symptoms Include:**

Cough	Shortness of Breath
Loss of taste or smell	Congestion/runny nose
Fever	Nausea or vomiting
Diarrhea	Headache
Muscles Aches	Sore throat

**If two or more of the above symptoms are exhibited, please keep your child home and consider being tested.**

**1. Exposure: If your child has a known exposure, please let the school know.**

**Follow the guidelines below:**

**(Taken from Madison Public Health)**

**It is safest if you quarantine for 14 days after the exposure. No test is required to end quarantine.**

**Other options include:**

- Quarantine for 10 days after exposure. No test is required to end quarantine. Monitor symptoms.
- Quarantine and test day 6 or 7 after exposure. If test is negative, the quarantine can end at day 7. You must have negative result to end before day 10. Testing cannot be before day 6. Monitor symptoms.

**2. Additional Guidelines:**

- If a student or anyone in a household is being tested, all siblings need to stay home until a negative test result is received.
- If a student tests positive, all siblings will be quarantined (regardless of vaccine status).
- Students must always be fever free for 24 hours with no fever reducing medication.
- When there is a positive case in a classroom, contact tracing will be done to determine if there is a need to quarantine other students.
- Vaccinated students (in most cases) will not need to be quarantined if close contact in a classroom due to masking.

If you have questions or concerns, please contact the office or email Mrs. Frederick at [kim.frederick@shjms.org](mailto:kim.frederick@shjms.org)
