

August 26, 2020

Dear Parents, Students, Teachers and Staff:

For the present time, and until further notice, our students will be eating lunch in the classrooms. In order to protect our many students with peanut and nut allergies, it is important to keep the classrooms Nut Free.

Students will be washing hands and desks will be cleaned frequently, however, even small amounts of food containing peanuts or tree nuts that may fall to the floor could become picked up by shoes and spread throughout the school unknowingly making contact with an allergic student. Even though our school will be cleaned daily, the risk of an allergic reaction would be present for a period of time.

Students who bring their lunch to school should be sure that food ingredient labels have been checked by parents to be sure that their food is nut free. Peanut butter sandwiches should be substituted with an alternative during this time. Mrs. Mullen has assured us that alternative sandwiches will also be available for purchase during the lunch period.

Thank you so very much for your cooperation and attention to this very important matter.

Sincerely:

Donna Hermosilla, RN

School Nurse
