Healthy Aging (Not Just for "Old" Folks!)

From the moment we are born, we are aging. The older we get, the faster it seems to go!

Decisions made for us in infancy about our nutrition, medical care, and nurture affect us all our life.

Genetics play a role also.

So do the decisions we made yesterday

Seize the Moment!
Today is the first day of the rest of your life!
It is never too early!
It is never too late!
