

## **Guidelines for Symptomatic Students:**

Students who exhibit one primary symptom or two or more secondary symptoms and are either not tested or test positive for COVID-19 should remain out of school and all school-related activities for 10 days after their symptoms began and at least 24 hours after their symptoms have improved. If a fever is present, the student must be fever free for at least 24 hours without the use of fever reducing medications such as Tylenol or Ibuprofen before returning to school.

If the student is being tested, they are to be excluded from school and school activities until the results of the test are received and COVID-19 infection is ruled out. Individuals who test negative for COVID-19 may return to school 24 hours after their symptoms improve.

A student may also return to school if a Dr. diagnoses them with a noninfectious condition such as asthma or allergies. A note should be sent to the nurse confirming this diagnosis.

### **Primary Symptoms (one needed)**

- **Cough**
- **Difficulty Breathing**
- **Loss of taste/smell**

### **Secondary Symptoms (at least 2)**

- **Extreme Fatigue**
- **Fever greater than 100 or chills**
- **Congestion/runny nose**
- **Nausea/vomiting/diarrhea**
- **Sore throat**
- **Headache**
- **Muscle or body aches**
