## Dinnertime for animals

### Background knowledge

When animals feel hungry, they need to eat. Food provides the animals with carbohydrates, faats, and proteins, which are important nutrients they need to grow and live. Some animals have to hunt for their food while other animals eat mostly plants. Plants can make their own food using sunlight and gases from the air and water. Animals that eat plants are called *herbivores*. Animals that eat herbivores are called *carnivores*.

### Science activity

Can you spot the herbivores in this group of animals? Write their names in the box.
