

## **Building Project Update 4/19/2020**

The parish building project is on indefinite hold. The building committee did complete a master plan to be proposed to the parish in our next town hall meetings. Those town hall meetings, the continuation of building committee meetings, and any future projects are on indefinite hold. In order to resume building committee meetings and work toward a building project we would need to meet three important criteria:

1. The suspension of public Masses would need to be lifted and permission to gather in groups would need to be reinstated.
2. The economy would need to rebound so that our country will have a sense of financial stability.
3. The parish community would need to feel safe medically, financially, and communally.
