

Summer 2021

Dear Parents,

Attached is a calendar of tasks to keep your child's skills sharp this summer. I will be sending home a summer journal so each student can write in script about all their adventures! Please have your child practice their math facts, count change, and tell time on an analog clock in order to achieve mastery. Here are some great websites that the children might enjoy.

time game - <https://www.ictgames.com/mobilePage/hickoryDickory/>

math topics - <https://www.aaamath.com/grade2.htm#topic7>

math flash cards - <https://www.varsitytutors.com/aplusmath/flashcards>

math baseball - <https://www.funbrain.com/games/math-baseball>

counting coins - <https://www.mathnook.com/math/countingmoneybas.html>

interesting facts about animals - <http://kids.nationalgeographic.com/kids>

I also recommend that the children read daily for at least 15 minutes.

Have a wonderful summer!

All the best,

Mary Butler
