## Diocese of Baton Rouge School Wellness Policy

The Diocese of Baton Rouge School Wellness Policy was first created in 2006, in accordance with the Child Nutrition and WIC Reauthorization Act of 2004, which required each local education agency participating in a program, authorized by the Richard B. Russell National School Lunch Act or the Child Nutrition Act of 1966 to have a Wellness Policy.

Schools play a critical role in creating a healthy environment for the prevention of childhood obesity and for combating problems, like type 2 Diabetes, that are associated with poor nutrition and physical inactivity. This law placed the responsibility of developing a school wellness policy at the local level, so the individual needs of each school can be addressed most effectively.

The Louisiana Legislative Act 331 (2005) further mandated the establishment of healthy standards for foods and beverages sold through vending, concessions or other such sales on school grounds.

The Diocese of Baton Rouge is committed to providing school environments that promote and protect children's health, well-being, and ability to learn by supporting healthy eating and physical activity. In response to the requirements of USDA and Act 331, the Diocese of Baton Rouge Nutrition Advisory Council has revised the current Student Wellness Promotion Policy to reflect these changes.

Decisions related to foods served at school shall be based first and foremost on the nutritional needs of young people.

## Preamble

Whereas, children need access to healthful foods and opportunities to be physically active in order to grow, learn, and thrive;

Whereas, good health fosters student attendance and education;

Whereas, obesity rates have doubled in children and tripled in adolescents over the last two decades, and physical inactivity and excessive calorie intake are the predominant causes of obesity;

Whereas, heart disease, cancer, stroke, and diabetes are responsible for two-thirds of deaths in the United States, and major risk factors for those diseases, including unhealthy eating habits, physical inactivity, and obesity, often are established in childhood;

Whereas, more high school students should participate in sufficient vigorous physical activity and attend daily physical education classes;

Whereas, very few children (two to nineteen years) eat a healthy diet consistent with the recommendations from My Plate;

Whereas, the USDA Regulations required by the Healthy, Hunger Free Act 2010 to meet Smart Snack nutrition standards as of July 1, 2014 for all foods and beverages made available to students during the day (outside of the school meal program).

Whereas, school districts around the country are facing significant fiscal and scheduling constraints; and

Whereas, community participation is essential to the development and implementation of successful school wellness policies;

Thus, the Diocese of Baton Rouge Schools are committed to providing school environments that promote and protect children's health, well-being, and ability to learn by supporting healthy eating and physical activity.

### **\*Adapted from Louisiana Department of Education Model Policy**

The Diocese of Baton Rouge has appointed the Superintendent of Catholic Schools, to coordinate and assess the implementation of a wellness policy. The appointed committee, will meet during the year to establish goals for and oversee school health and safety policies and programs, including development, implementation and periodic review and update of the Diocesan wellness policy. The Child Nutrition Program Director is responsible for implementing and assessing the Wellness Policy as it pertains to nutritional services. The Principal is responsible for the implementation and assessment at the local school level.

- Diocesan schools will engage students, parents, teachers, child nutrition professionals, health professionals, and other interested community members in developing, implementing, monitoring, and reviewing nutrition and physical activity policies.
- All students in grades K-12 will have opportunities, support, and encouragement to be physically active on a regular basis.
- Each school is encouraged to meet the nutrition requirements as outlined by the USDA and Smart Snack program.
- Qualified child nutrition professionals will provide students with access to a variety of affordable, nutritious, and appealing foods that meet the health and nutrition needs of students; will accommodate the religious, ethnic, and cultural diversity of the student body in meal planning; and will provide clean, safe, and pleasant settings and adequate times for students to eat.
- All schools in the Diocese should participate in available and appropriate federal school meal programs.
- Schools will provide nutrition and physical education to foster lifelong habits of healthy eating and physical activity; will establish linkages between health education and school meal programs; and related community services.

## **Federal and State Requirements**

The Diocese of Baton Rouge schools will:

- Offer a school lunch program with menus that meet the meal patterns and nutrition standards established by the U.S. Department of Agriculture and the Louisiana Department of Education, Office of School and Community Support.
- Provide school breakfast and snack and meal programs (where approved and applicable) with menus that meet the meal patterns and nutrition standards established by the U.S. Department of Agriculture and the Louisiana Department of Education, Office of School and Community Support.
- Encourage school staff and families to participate in school meal programs.
- Operate all Child Nutrition Programs with school foodservice staff who are qualified according to current professional standards.
- Establish food safety as a key component of all school food operations and ensure that the food service permit is current for the cafeteria school site.
- Follow State Board of Education policies on competitive foods and extra food sales.
- Establish guidelines for all foods available on the school campus during the school day with the objective of promoting health and reducing obesity. (See “Other School Policies.”)

## **Schools Policies**

The Diocese of Baton Rouge schools will provide:

- Adequate time for breakfast, lunch, snack, and meal programs (where approved and applicable).

- Whole and enriched grain products that are high in fiber, low in added fats and sugars, and served in appropriate portion sizes consistent with the current USDA standards.
- Fresh, frozen, canned or dried fruits and vegetables using healthy food preparation techniques and 100 percent fruit or vegetable juice.
- Nonfat, reduced fat, low-fat, plain and/or flavored milk and yogurt, nonfat, reduced fat and/or low-fat real cheese.
- Healthy food preparation techniques for lean meat, poultry, and fish.
- School meals accessible to all students with a variety of delivery strategies, such as breakfast in the classroom, grab-and-go meals, or alternate eating sites.
- A cafeteria environment conducive to a positive dining experience, with socializing among students and between students and adults; with supervision of eating areas by adults who model proper conduct and voice level; and with adults who model healthy habits by eating with the students.

## Other School Policies

The Diocese of Baton Rouge schools will:

- Discourage teachers to use food items of value as **rewards** for student accomplishments and the withholding of food as a punishment (i.e. restricting a child's selection of flavored milk at meal time due to behavior problems). (See appendix A for reward alternatives.)
- Encourage serving healthy food at school **parties**. Notices shall be sent to parents/guardians either separately or as part of a school newsletter, reminding them of the necessity of providing healthy treats for students. (See appendix B for healthy school parties.)
- Discourage selling food items of limited nutritional value as **fundraisers**. (See appendix C for healthy fundraising alternatives.)
- Each school Principal shall determine if students shall be allowed to possess drinking water in classrooms during class.
- Encourage nutritious and appealing options (such as fruits, vegetables, beef jerky, reduced-fat milk, reduced fat-yogurt, reduced-fat cheese, 100% juice and water or items listed on the Smart Snack list) whenever foods/beverages are sold or otherwise offered **after school**.
- Energy drinks may not be sold, provided or brought on campus by anyone (definitely students).

## Nutrition Education

The Centers for Disease Control (CDC) advocates the need for school-based nutrition education. Because a high percent of all children and adolescents are enrolled in school, the classroom environment is ideally suited to give students the skills and support needed to adopt healthful eating behaviors for life. Teachers, food service personnel, and other staff can offer their expertise and model appropriate eating behaviors. Additionally, students have opportunities to practice healthful eating behaviors at school. Collaboration among Child Nutrition Program staff, teachers, the community, families and institutional services is necessary.

There are two broad approaches to school-based nutrition education – traditional classroom lessons that address general knowledge, attitude, and behavior – and behavioral change programs based on social learning theory. Using both venues is recommended for optimal impact.

Nutrition education can be integrated into content area instruction across the curriculum. The alignment of nutrition lessons with standards and benchmarks provides for easy integration of the information into routine instructional planning. Integration of nutrition information into teaching content areas should use the resources of the classroom, the school, and the community. Nutrition education also is part of health education, which enables students to acquire knowledge and skills needed to practice good health. (See LA Fit Kids website for ideas.)

Behavior change can be enhanced through social learning theory, as well. Social learning theory may include a parent component for younger students and peer involvement for older students. School activities such as Family Nutrition Night can promote the social learning theory. Additionally, the cafeteria can be used as part of the total educational system for modeling behavior.

The Diocese of Baton Rouge schools will:

- Promote and implement nutrition education that promotes lifelong healthful eating practices;
- Use lessons that are age-appropriate, behaviorally focused content that is developmentally appropriate and culturally relevant;
- Provide hands-on activities that are fun;
- Provide repeated opportunities for students to taste foods that are low in fat, sodium and added sugars and high in vitamins, minerals and fiber;
- Focus on positive aspects of healthful eating behaviors; and
- Promote social learning techniques such as role modeling, providing incentives, developing social resistance skills, overcoming barriers to behavioral changes and goal setting;
- Strive toward hiring qualified, certified health education teachers;
- Provide staff development for teachers.

Diocese of Baton Rouge is committed to serving healthy meals to children, with plenty of fruits, vegetables, whole grains, and fat-free and low fat milk; that are moderate in sodium, low in saturated fats, and have zero grams trans-fat per serving (nutrition label or manufactures specification); and to meeting the nutrition needs of the school children within their calorie requirements.

Our school participate in the United State Department of Agriculture (USDA) child nutrition programs, including the National School Lunch Program (NSLP), the School Breakfast (SBP).

### **Water**

To promote hydration, free, safe, unflavored drinking water shall be available to all students throughout the school day and throughout every school campus that participated in the school breakfast and lunch program. Drinking water is available where school meals are served during mealtime.

### **Competitive Foods and Beverages**

The Child Nutrition Program is recommending all foods and beverages available to students on the school campus during the school day support healthy eating. The food and beverages sold and served outside of the school meal programs (e.g., “competitive” foods and beverages) shell

meet the nutrition standards as outlined in 7CFR 210.11. These standards aim to improve student health and well-being, increase consumption of healthful foods during the school day and create an environment that reinforces the development of healthy eating.

## Physical Education

Both regular physical activity and nutrition mutually contribute to healthy citizens and reduce the incidence of diabetes, cardiovascular diseases, depression, obesity, and other chronic health problems. Federal Dietary Guidelines for Americans recommend that children and teenagers be physically active for an accumulation of at least 60 minutes daily. Since children spend the majority of their time at school during weekdays, it is imperative that schools provide students with the means to participate in physical activity.

When examining Physical Education programs, ask the question, “Does the physical education program help every student attain the knowledge, skills, and attitudes needed for them to lead an active, productive life and maintain a health-enhancing level of physical fitness?” Promote and implement quality physical education programs that emphasize and promote participation in lifelong physical activities and reaching a health enhancing level of physical fitness among all students. Quality physical education programs should include the following components:

1. Emphasizes knowledge and skills that promote a lifetime of physical activity.
2. Is based on standards that define what students should know and be able to do.
3. Keeps students active for most of the class time.
4. Provides many different physical activity choices.
5. Meets needs of **all** students, especially those who are not athletically gifted.
6. Features cooperative, as well as competitive, games.
7. Develops students’ self-confidence and eliminates practices that humiliate students.
8. Promotes physical activity outside of school.
9. Teaches self-management skills, such as goal-setting and self-monitoring.
10. Actively teaches cooperation, fair play, and responsible participation in physical activity and is an enjoyable experience for students.
11. Focuses, at the high school level, on helping adolescents make the transition to a physically active adult lifestyle.

In addition the Diocese of Baton Rouge schools will:

- Strive toward having qualified, certified physical education teachers guide physical activity instruction in elementary grades as well as in middle and high school physical education classes.
- Provide staff development on standards implementation for physical education instructors.
- Strive to provide that adequate safety policies and provisions for physical education programs.

- Strive toward ensuring that adequate equipment is in place to assist students in being active daily.
- Strive to provide a variety of fitness training, motor skills, and team work modules in physical education at the high school level needed for graduation.
- Use a recognized instrument or program such as *Fitnessgram*®, to evaluate student's physical fitness.
- Provide age-appropriate equipment and facilities for implementing quality physical education programs.

## Physical Activity Opportunities

In order to improve health and fitness of our students and to prevent childhood obesity, we must put increased emphasis on the importance of physical activity for students. The following recommendations are made in the best interest of students recognizing that schools, parents and communities will need to be creative in finding additional opportunities and resources for physical activity outside physical education classes.

The Diocese of Baton Rouge schools will provide opportunities for physical activity:

- Recognize that daily physical activity is essential to student welfare and academic performance.
- Encourage physical activity during recess for elementary students, intramurals programs, integration in the academic curriculum, and clubs as well as in physical education programs.
- Provide daily recess for all children in K-8<sup>th</sup> grade.
- Work with the community to create ways for students to walk, bike, skateboard, roller-skate, play basketball, play softball, play baseball, or participate in other physical activities in a safe location at times other than the school day.
- Encourage parents and guardians to support students' participation in physical activities, to be physically active role-models, and to include physical activities in family plans.
- Encourage school staff to participate in physical activities to serve as role models.
- Support community-based physical activity programs.

Louisiana Association for Health, Physical Education, Recreation and Dance (LAHPERD) is a valuable resource. (See LA Fit Kids)

## Definitions

**A. Competitive Foods:** Foods and beverages sold or made available to students that compete with the school's operation of the National School Lunch Program or School Breakfast Program. This definition includes, but is not limited to, food and beverages sold or provided in vending machines, in school stores or as part of in-school fundraisers. In-school fundraisers include food items sold by school administrators or staff (principals, coaches, teachers, etc.), students or student groups, parents or parent groups, or any other person, company or organization. These items may be sold at school *only* if they meet the requirements *USDA Department of Education*.

**B. Elementary School:** School with grade 9 and one or more lower grades, but not grades 10, 11, or 12; schools with any single grade or combination of grades below grade 9.

**C. High School:** any school whose grade structure falls within the 6 through 12 range and includes grades in the 10 to 12 range, or any school that contains only grade 9.

**D. FMNV:** Foods of Minimal Nutritional Value. Refers to the four categories of foods and beverages (soft drinks, water ices, chewing gum, and certain candies) that are restricted by the U. S. Department of Agriculture under the child nutrition programs. (See section on FMNV.)

**E. Food Service:** Refers to the school's operation of the National School Breakfast, Lunch, Snack and Meal Programs (where approved and applicable) and includes all food service operations conducted by the school principally for the benefit of school children, all of the revenue from which is used solely for the operation or improvement of such food services.

**F. Fruit or Vegetable Drink:** Beverages labeled as containing fruit or vegetable juice in amounts less than 100 percent.

**G. Fruit or Vegetable Juice:** Beverages labeled as containing 100 percent fruit or vegetable juice.

**H. School Day:** For the purpose of the Louisiana School Wellness Policy, the school day begins during a period of thirty minutes prior to and thirty minutes after the end of the normal school day

**I. School Meals:** Meals provided under the National School Breakfast Program and School Lunch Program, Snack Program, and Meal Program (where approved and applicable) for which schools receive reimbursement in accordance with all applicable federal regulations, policies, instructions and guidelines.

## Appendix A

### Alternatives to Using Food as a Reward

At school, home, and throughout the community kids are offered food as a reward for “good” behavior. Often these foods have little or no nutritional value but are easy, inexpensive, and can bring about short-term behavior change.

#### **There are many disadvantages to using food as a reward:**

- ◆It undermines nutrition education being taught in the school environment.
- ◆It encourages over-consumption of foods high in added sugar and fat.
- ◆It teaches kids to eat when they’re not hungry as a reward to themselves.

- \*Kids learn preferences for foods made available to them, including those that are unhealthy.
- \*Poor food choices and inadequate physical activity contribute to overweight and obesity.

### Students Learn What They Live

Kids naturally enjoy eating healthy and being physically active. Schools and communities need to provide them with an environment that supports healthy behaviors. Below are some alternatives for students to enjoy instead of being offered food as a reward at school.

#### **ZERO-COST ALTERNATIVES**

- ◆Teach the class
- ◆Read outdoors
- ◆Enjoy class outdoors
- ◆Read to a younger class
- ◆Make deliveries to the office
- ◆Earn play money for privileges
- ◆Eat lunch outdoors with the class
- ◆Eat lunch with a teacher or principal
- ◆Listen to audio book on a technology device
- ◆Have a teacher read a special book to the class
- ◆Earn time on a technology device

#### **LOW-COST ALTERNATIVES**

- ◆Select a paperback book/ magazine
- ◆Enter a drawing for donated prizes
- ◆Take a trip to the treasure box (non-food items)
- ◆Get stickers, pencils, and other school supplies
- ◆Receive a “mystery pack” (notepad, folder, sports cards, etc.)

## Appendix B

### Healthy School Parties

School can play a major role in helping students become fit, healthy and ready to learn. One way to accomplish this is for foods offered in schools to support lessons learned in the classroom regarding nutrition and physical activity. What better venue than schools—which have a great impact on children—to support the message that proper nutrition and physical activity are a key part of a healthy lifestyle? Positive examples of making healthy eating choices and encouraging physical activity should be visible throughout the school. Parties as well as cafeterias, school stores, vending machines, and after-school events offer opportunities for schools to reinforce the message that making healthy food choices and being physically active means a healthier body and a sharper mind.

### Snack Ideas for School & Classroom Parties

Of course, the foods offered at school parties should add to the fun, but try to avoid making them the main focus. Remember, schools are responsible for helping students learn lessons about good nutrition and healthy lifestyles and students should practice these lessons during school parties. For example, consider combining student birthday parties into one monthly event that incorporates physical activities as well as healthy snacks. Also, be sure to consider ethnic and medical food restrictions and allergies when providing classroom snacks.

Below are the nutritional requirements for the Smart Snack Program. The Smart Snack standards are to be considered for events sold all foods sold outside the school meal programs, on the school campus, at any time during the school day. Serving all healthy foods and incorporating physical activities make a powerful statement. Actions speak louder than words: Lead by example.

- ◆ Fresh fruit and vegetables – Buy locally when possible
- ◆ Baby carrots and other vegetables with Low-fat dip
- ◆ Yogurt
- ◆ String cheese
- ◆ Fig cookies
- ◆ Animal crackers
- ◆ Baked chips
- ◆ Low-fat popcorn
- ◆ 100% fruit juice (small single-serves)
- ◆ Granola bars\*
- ◆ Bagels with low-fat cream cheese
- ◆ Soft pretzels and mustard
- ◆ Pizza (no extra cheese and no more than one meat)
- ◆ Pudding
- ◆ Cereal bar
- ◆ Single-serve low-fat or fat free milk (regular or flavored)
- ◆ Bottled water (including unsweetened flavored water)

\*May be allergens and/or a choking risk for some people. Please check with a health care provider.

Beverage Policy, <http://mihealthtools.org/hsat/default.asp?tab=resourceguide>

## Appendix C

### Smart Fundraisers for Today's Healthy Schools

Raising money may present a constant challenge for schools. School fundraisers may help pay for computers, field trips, athletics, music, art, and other programs that educate and enrich young lives – important programs that are not always covered by shrinking school budgets. More than just raising money to pay for valuable programs, a well-run fundraiser can also be an experience that educates, builds self-esteem, provides community service, and promotes school and community spirit.

Following are web sites and fundraising ideas that offer alternatives to selling candy/ snacks with low nutritional value. When healthy food choices are used as fundraising items, the healthy eating message presented in the schools is reinforced. Some of the ideas even have the added benefit of providing additional physical activity opportunities for students.

Take a look and help your school select a creative fundraising alternative to selling foods of limited nutritional value.

#### Search the Web

Select a search engine and type in “school fundraisers” to access 112,000+ sites. A few of these sites follow:

<http://healthymeals.nal.usda.gov>

<http://www.actionforhealthykids.org>

<http://www.healthysd.gov>

◆ [www.PTOtoday.com](http://www.PTOtoday.com)

Lists fundraising activities by categories, has a “work vs. reward” equation, contains a parent sharing section on “what works, what doesn’t and why.”

◆ [www.pbrc.edu/division-of-education/vending-list-for-schools](http://www.pbrc.edu/division-of-education/vending-list-for-schools)

Lists vending snack recommendations from the Pennington Biomedical Research Center

## Smart Fundraisers for Today’s Healthy Schools, Cont’d

Schools should sell an ever-expanding variety of non-food items such as:

- ◆ Fun Run
- ◆ Olympic Day
- ◆ Activity Gift wrap
- ◆ Magazine subscriptions
- ◆ Garden seeds
- ◆ Candles
- ◆ Discount coupon books
- ◆ Raffles of gift baskets
- ◆ Plants and flowers
- ◆ School spirit items
- ◆ Cookbooks

Schools are also utilizing a wide variety of traditional and non-traditional fundraising events such as:

- ◆ Car washes
- ◆ Walk-a-thons, bike-a-thons, skate-a-thons, etc.
- ◆ Family game nights
- ◆ “Hire a student day” for odd jobs, babysitting services, etc. (with proceeds going to the school)
- ◆ 3-on-3 basketball or soccer tournaments
- ◆ Silent auctions
- ◆ Talent shows
- ◆ Family skate nights
- ◆ Monday night football “Dads Night Out”
- ◆ Moms Night Out” restaurant discounts
- ◆ School Movie Night (free movies can be rented at the library)
- ◆ Raffle of dinner prepared by school faculty
- ◆ Fashion show
- ◆ Dinner and a movie
- ◆ Dinner theater (students perform play)
- ◆ Parent “principal of the day”
- ◆ Sell VIP parking spaces
