

Dear Parents,

We are studying our Solar System. They have a project of making the Solar System, due by Oct. 23. This can be done on a poster, made as a hanging Solar System, or on a Styrofoam square with the balls of the different planets. The planets should be named and in the order they come in the Solar System.

We will be planning a trip to the Space Center sometime in October or November.

Thanks for your help,

Linda Cartwright
