

MS. Stroud's PK-4 Class

October 2020 News

Hello everyone! For the month of October, we will start off learning and exploring the differences in weather patterns. We will learn about the sun, wind, clouds, snow, and rainbows.

From there we will slide into discovering the different seasons: summer, autumn, winter, and spring.

To keep up with the current autumn season, we will delve into learning about changing leaves, the difference in daylight and darkness, hibernation, and migration.

The letters we are concentrating on writing are: A, B, C, H, N, U. We are working on recognizing all the letters of the alphabet.

For numbers, we are counting aloud to 50 and practicing writing numbers 1, 2, 3, 4.

We are continuing to review the colors, shapes, and alphabet letters, along with the months and days of the week.

We are currently learning to add simple numbers by using word problems. Example: "One bunny is sitting under the tree, two bunnies came up to visit him. How many bunnies are now under the tree?"

We have been and are continuing practicing cutting out shapes, staying on the lines, recognizing patterns, and matching.

Feel free to contact me with any questions!
