

Dear Middle School Students,

Your Math work for this summer can be found on IXL.

You are to complete 30 minutes of diagnostic work each week and the Summer Boost skill plan for your previous and incoming grade level.

Each skill plan has a 4 week (20 lesson) duration.

You may complete the two plans anytime over the summer.

The Summer Boost can be found in the skill plan tab below the Diagnostic tab on the IXL home page.

Incoming 6th graders will complete the grade 5 and grade 6 math summer plan.

Incoming 7th graders will complete the grade 6 and grade 7 math summer plan.

Incoming 8th graders will complete the grade 7 and grade 8 math summer plan.

I will be monitoring your progress and checking that the weekly diagnostic is completed.

It will be due by 8 pm. on each Sunday night.

If you have any questions, you may email me at [stenpenny@sj-school.org](mailto:stenpenny@sj-school.org).

Enjoy your summer, and I'm looking forward to seeing you in September.

Sincerely,

Mrs. Tenpenny
