Holy Trinity Catholic School, South St. Paul **2021-2022 ASBESTOS NOTIFICATION**

Federal legislation requires each primary and secondary school in the nation to complete a stringent inspection for asbestos and to develop a plan of management for all asbestos-containing building materials. Holy Trinity Catholic School, South St. Paul has a goal to be in full compliance with this law and is following the spirit, as well as the letter of the law. As a matter of policy, the district shall continue to maintain a safe and healthful environment for our community's youth and employees.

In keeping with this legislation, all buildings owned or leased by Holy Trinity Catholic School, South St. Paul have been inspected by EPA accredited inspectors and samples were analyzed by an independent laboratory. Based on the inspection, the school prepared and the state approved a comprehensive management plan for handling the asbestos located within its buildings in a safe and responsible manner.

Federal law requires a periodic walk-through (called "surveillance") every six months of each area containing asbestos. In addition, the law requires all buildings to be re-inspected every three years after a management plan went into effect. MacNeil Environmental, Inc. is accomplishing this under contract.

Short-term workers (outside contractors - i.e., telephone repair workers, electricians and exterminators) must be provided information regarding the location of asbestos in which they may come into contact. All short-term workers shall contact the school's Designated Person before commencing work to be given this information.

Holy Trinity Catholic School, South St. Paul has a list of the location(s) and type(s) of asbestos containing materials found in that school building, a description and time-table for their proper management.
