Averages for the  
eleven months

meals were served 201 \$370.27

For the first five months, food was being prepared to serve 300 meals. Starting in September, that number was reduced to 200 meals.

From May through July are numbers were higher because of the large number of children that were served during summer school break.

Our numbers dropped off starting in October due to the reduction of immigrants being allowed into the United States and thus Catholic Charities programs at the St. Anthony site. Starting in February our numbers have started to increase with the participation of more local residents.

Approximately 35 meals monthly have been delivered to shut-ins with most of those deliveries going to St. Cecilia's Senior Housing
